

AI Knowledge Base Management and Search System

Don't let the master's skills be dusted, and let the legendary martial arts secrets be carried forward~~~

The first step of AI transformation: digitization of the knowledge base! From knowledge management to industrial transformation, fully activate AI workforce.

In the current era driven by digitalization and artificial intelligence (AI), **knowledge base management** has become central to organizations and individuals maintaining competitiveness. It is not only a container for storing information, but also a key mechanism for transforming "information" into "intelligence" and "action". **This knowledge base management and search system combines generative AI (such as RAG technology) to achieve active recommendations and intelligent Q&A, further unlocking the potential of enterprises**

Direct File or Folder Upload:

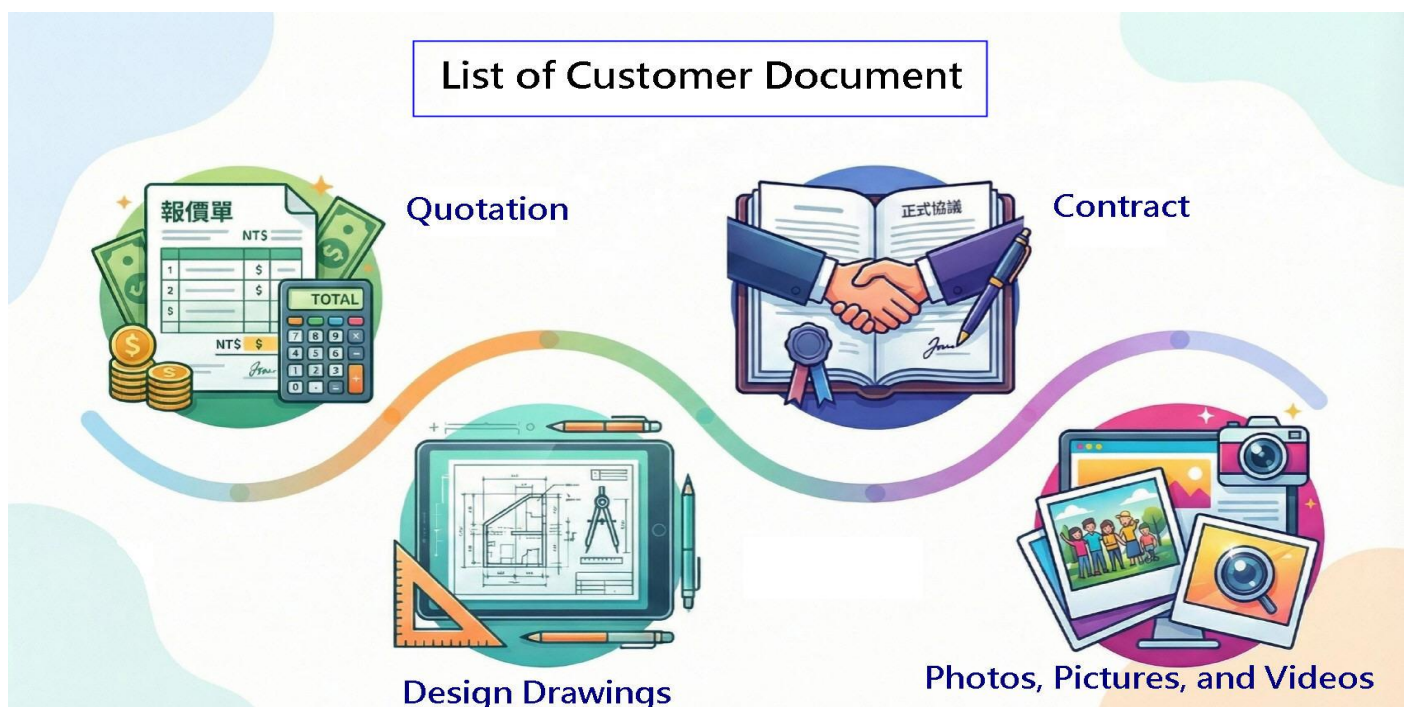

The system supports various formats such as PDF, Word, Excel, images, videos, audio files, CAD files, and more.

The system provides the following information:

File name, automatically generated summary, smart tags, department, file location, size, upload date, etc.

Interacting via natural language, with assistance from a smart assistant:

Searching archives, answering questions, and organizing materials.

AI Knowledge Base Management and Search System

Nothing is impossible with AI! My amazing assistant is AI!

Overview of the AI Knowledge Base Management and Search System:

It offers 5 main modules, including: (Click to switch to the interface of that module)

1. Upload File :

Upload files or folders, and the system supports various formats such as PDF, Word, Excel, images, videos, audio files, CAD files, etc.
